SUMMARY

Final-year Computer Science student (GPA 3.90/4.00) focused on agentic AI: LLM orchestration with LangGraph, fine-tuning (SFT, RL, LoRA) and production deployment. Builds production-grade AI agents, RAG pipelines and evaluation workflows across industry and research internships; 1st place, Technofest UBM 2026.

EXPERIENCE

Backend AI Engineer Intern · FlyRank AI Jun 2026 – Present

- Implemented AI-driven workflow automation tools, improving productivity by 25%.
- Developed production-grade AI agents, reducing token costs by 15% through workflow and prompt optimisation.

AI Research Intern · Calvin Institute of Technology Jun 2026 – Aug 2026
Jakarta, Indonesia

- Developed LLM-based agentic orchestration systems for Q&A workflows.
- Evaluated AI systems against defined, task-relevant metrics.
- Optimised AI workflows for production deployment, reducing token usage by up to 20%.

Personal & Academic Tutor · Freelance Jan 2019 – Present
Jakarta, Indonesia

- Taught mathematics, physics and chemistry at IGCSE and IB level.
- Started building a student performance tracking system with modern web technologies and AI.

PROJECTS

Personal Finance AI Agent | RLHF, LLM, RAG Sep 2026 – Present

- Developed an AI agent for budgeting, financial analysis and question answering.
- Improved financial wealth by ~10% in backtesting simulation.

SIGAP: Agentic MRP & Vendor-Sourcing System | FastAPI, LangGraph, PostgreSQL/Supabase, React Oct 2026
SOKRATES × BINUS AI Agentic Hackathon, Intelligence Supply Chain track · team of 3 · Demo Day, 31 Oct 2026

- Owned the agent logic, LLM API calls and tools: a LangGraph agent that routes each request to MRP Q&A, purchase-order automation or a direct reply.
- Implemented guarded text-to-SQL, allowing SELECT-only queries (validated with sqlglot) executed in read-only transactions.
- Built a Telegram supplier agent that negotiates purchase-order changes within manager-set limits.
- Gated every answer on an LLM-judge score of at least 0.80 before returning it to the user.

AI Journal Paper Summariser | LangGraph, LLM, RAG Apr 2026 – Present

- Developed an LLM-driven application that summarises journal papers into a PDF report.
- Fine-tuned an LLM with quantisation and LoRA, using supervised fine-tuning and reinforcement learning on LLaMA-Factory.
- Reduced literature review time by ~40% in internal testing.

Plantatio | LangGraph, RAG, Knowledge Graph May 2026
1st place, Technofest UBM 2026

- Fine-tuned LLMs with supervised fine-tuning and reinforcement learning using LoRA on LLaMA-Factory and Unsloth.
- Evaluated models with the RAGAS framework and custom metrics across the AI workflow.
- Integrated the AI workflow pipeline with the API and frontend.

Car Damage Classification, Detection & Captioning | PyTorch, OpenCV, Ultralytics Nov 2025 – Dec 2025

- Curated 1,000+ car-damage images and trained a multi-stage deep learning model that detects damage, localises it, estimates its severity and generates a caption.
- Built a CNN-based localisation model, improving accuracy by 9% and precision by 3% over the baseline.

EDUCATION

Calvin Institute of Technology Aug 2023 – Aug 2027 (expected)
Bachelor's degree in Computer Science · GPA 3.90/4.00

Pelangi Kasih Jan 2022 – Jan 2023
High School Diploma, Natural Sciences (IPA)

AWARDS

1st place, Technofest UBM 2026 (Plantatio) Jun 2026

Rector's List 2024, 2025, 2026 · Calvin Institute of Technology 2024 – 2026

LEADERSHIP & VOLUNTEERING

External Coordinator · Calvin Institute of Technology Jan 2025 – Jan 2026
Jakarta, Indonesia

- Coordinated the external relations team, delivering two seminar programmes and two tutorial programmes on basic Python programming and data structures & algorithms.
- Managed the seminar and tutorial programmes, increasing student engagement by up to 10% over the previous year's team.

Staff, "Mobil Pintar" Programme · Yayasan Pondok Indah Kasih May 2025 – Jul 2025
Jakarta, Indonesia

- Taught children through the foundation's "Mobil Pintar" programme alongside other staff members.
- Increased social media awareness by up to 20% through documentaries.

SKILLS

LLMs & Agents	LangGraph, RAG, LLM fine-tuning (SFT, RL, LoRA, quantisation), LLaMA-Factory, Unsloth, RLHF, RAGAS, NLP, Reinforcement Learning, Knowledge Graphs
ML / Deep Learning	PyTorch, Ultralytics, OpenCV, Hugging Face
Data & Infrastructure	Python, SQL, PostgreSQL / Supabase, ChromaDB, Neo4j, FastAPI, Docker, GitHub
Languages	Bahasa Indonesia (native), English
Soft skills	Active listening · Analytical thinking · Critical thinking · Problem-solving · Teamwork · Time management
